LIGHTED BOLLARDS

Cal Pipe's Lighted security bollards come standard in stainless steel with a #4 finish that makes them a favorite with architects and specifiers. Lighted bollards not only add illumination to improve safety and security in poorly or unlighted areas but are also aesthetically pleasing in the property landscape.

Choose illumination from 9W to 42W high lumens lamps behind vertical slot lenses designed for protect the bollards against impact or vandalism. Lighted bollards come in embedded and base-plate styles. The base-plate unit has an optional stainless steel cover that fits over the surface plate securing the installation. Let us provide you with more information on UL ratings, available wall-thicknesses, installation and footing specifications specific to your needs.

LIGHTED SECURITY BOLLARD APPLICATIONS:

Vehicle Access Control
